PROFESSIONAL SUMMARY

Computer Science candidate with hands-on project experience in data analytics, dashboard development, full-stack web development, database systems, authentication, cryptography, and information retrieval. Skilled in Python, Pandas, NumPy, Matplotlib, Seaborn, Power BI, Excel, C#, ASP.NET, PHP, SQL Server, and MySQL. Experienced in data cleaning, EDA, feature engineering, data visualization, interactive dashboards, secure CRUD applications, RBAC, OTP authentication, TF-IDF indexing, and Bloom filter-based search. Currently pursuing Data Science training and available to join immediately.

PROJECTS

Retail Sales Intelligence & Profit Optimization

Data Analytics Project | Python | Pandas | NumPy | Matplotlib | Seaborn | Excel

• Analyzed retail sales data to uncover profitability patterns across products, categories, regions, and customer segments.

• Investigated discount impact, sales and profit trends, and identified high-sales products generating negative profit.

• Built an interactive Excel dashboard with KPI cards, PivotTables, PivotCharts, and slicers for business reporting.

HR Data Analytics & Dashboard

Data Analytics Project | Python | Pandas | NumPy | Matplotlib | Seaborn | Excel

• Cleaned and analyzed HR data to explore employee demographics, departments, job roles, salaries, experience, and performance.

• Performed exploratory data analysis and created visualizations to identify workforce patterns and trends.

• Built an interactive Excel dashboard with KPIs, PivotTables, PivotCharts, and slicers for HR reporting.

Spotify Top Songs Analytics

Data Analytics Project | Python | Pandas | NumPy | Matplotlib | Seaborn

• Analyzed Spotify song data to explore streaming performance, audio features, chart performance, and popularity patterns.

• Performed data cleaning, feature engineering, exploratory analysis, visualization, and correlation analysis.

Netflix Movies & TV Shows Analysis

Data Analytics Project | Python | Pandas

• Analyzed 8,807 Netflix records across title, type, director, country, release year, rating, duration, and category fields.

• Checked duplicates and missing values, cleaned incomplete records, and prepared the dataset for exploratory analysis.

Police Crime Record Bureau System

Major Project | ASP.NET (C#) | SQL Server | Jan 2026 - Mar 2026 | UIT Kuravankonam

• Developed a multi-role web application with OTP authentication, RBAC, encrypted document handling, and case management.

• Implemented Bloom filter-based search with TF-IDF keyword indexing for efficient case-record retrieval.

Retired Hands Empowering System

Minor Project | HTML | CSS | Bootstrap | JavaScript | PHP | MySQL | Feb 2025 - Jul 2025 | UIT Kuravankonam

• Built a full-stack application with registration, login, profile CRUD, validation, district filtering, and responsive design.

• Used parameterized SQL queries, prepared statements, and hashed credentials to improve data and application security.

TECHNICAL SKILLS

Languages	Python, C#, PHP, JavaScript, SQL, HTML/CSS
Libraries	NumPy, Pandas, Seaborn, Matplotlib, OpenCV (cv2)
BI & Visualization	**Power BI**, Microsoft Excel, Data Visualization
Frameworks & Tools	ASP.NET, Bootstrap, Jupyter Notebook, Git/GitHub, VS Code, Visual Studio
Databases	SQL Server, MySQL
Analytics	Data Cleaning, EDA, Feature Engineering, Dashboard Development
Concepts	RBAC, Cryptography, OTP Auth, TF-IDF, Bloom Filter, CRUD, Data Science
Soft Skills	Problem Solving, Teamwork, Documentation, Continuous Learning

EDUCATION & CERTIFICATION

Bachelor of Science - Computer Science 2024 - 2026

University Institute of Technology (UIT), Kuravankonam | University of Kerala

Status: Degree coursework completed

Data Science - In Progress 2026 - Present

LBS Skill Centre, Thiruvananthapuram

ADDITIONAL INFORMATION

Languages Known: English, Malayalam, Hindi **Availability:** Immediate Joiner

Interests: Data Science, Data Analytics, Cybersecurity, Backend Systems
